

## **Designer / Drafter Job Description**

### **Position Summary**

Responsibilities include creating, modifying, and maintaining precise 3D CAD models (SolidWorks preferred) and 2D CAD drawings. Works closely with sales, engineering, manufacturing, procurement, and quality to ensure timely engineering change requests.

### **Qualification / Experience**

The successful candidate will have a vocational or associate degree in drafting with 2+ years of related experience or 5+ years of CAD drafting experience in a related field is required. Experience with an ERP/MRP business system is highly recommended.

This is a daily onsite position.
